**Ref: Petition RM-9208, Low Power AM and FM Microbroadcasting Service.**

Dear Mr. Secretary:

In general, I agree with Petition RM-9208. However, I request that the output power be increased from 1 watt to 10 watts and the height limitation be increased from 50 feet to 100 feet. My reason for this is to cover an area more likely to contain a significant number of residents who would make use of the service. The specialization of programming typical of this type broadcasting would appeal to a low percentage of the general population, especially in the larger cities.

Sincerely,

*William L. Martin*
